Questions on the Table

How can biodiesel and ethanol demand be forecasted?

How can biodiesel and ethanol supply be forecasted?

Where are the global biofuels markets?

Where are the global biofuels markets?

Mandates

Where are the global biofuels markets?

How can the global biodiesel markets grow?

The three largest markets, USA, Brazil and EU account for 95% of the global market. In all three cases the markets exist because of government mandate. The mandated volumes are locked in the USA and EU for the rest of the decade, with a high degree of certainty.

Total market size across the globe should be of the order of 70m Metric Tonnes, with ethanol accounting for 75% of the volume.

For demand to grow beyond this, it would require price competitiveness for a considerable period of time, at which point market size could grow to 500m Metric Tonnes.
